## Aspiring Cyber Security Professional

MSc Cybersecurity graduate with a strong technical background in IT and network design. I've built a solid security foundation through my CEH, CCNA, and Google Cybersecurity certifications and am ready to apply my skills in a junior cyber analyst role.

## EDUCATION

MSc Cyber Security with Advanced Practice  
Computer Science and Engineering

Northumbria University, 2023, UK  
Visvesvaraya Technological University, 2018, India

## CERTIFICATIONS

Google Cybersecurity Professional Certificate | Feb 2026  
Certified Ethical Hacker (CEH) | Dec 2024  
Certified Ethical Hacker (Practical) | Oct 2024  
Cisco Certified Network Associate (CCNA 200-301) | Jun 2024  
eLearnSecurity Jr. Penetration Tester (eJPTv2) | Jan 2024

## PROJECTS

### Home Lab Security Testing Environment

- Configured and managed a home lab environment using VMware.
- Set up virtual machines running Kali Linux, Windows 10, and Damn Vulnerable Web Application (DVWA).
- Conducted security testing and penetration tests to enhance practical skills in cybersecurity.

### Network Design and Implementation for a Small Business Using Packet Tracer

- Designed and implemented a comprehensive network infrastructure for a small business, incorporating routers, switches, and wireless access points to ensure reliable connectivity and scalability.
- Configured Access Control Lists (ACLs) to manage traffic flows and enhance network security.
- Implemented the OSPF routing protocol in a multi-area network to ensure efficient and scalable routing.

## EXPERIENCE

### IT Support and Website Design (Freelancing)

Catalyst IT Consultancy LTD | Apr 2024 - Present

- Website design/deployment, content updates, theme customization for clients
- Microsoft 365 user management (account unlocks, access permissions)
- Hardware install/troubleshoot (printers, workstations)
- Network config for client sites (VLANs, Switches, Routers)
- End-user technical support & workflow improvements

### IT Support and Networking (Internship)

Catalyst IT Consultancy LTD | Jan-Apr 2022

- Monitored and analyzed system and network logs to identify potential security issues.
- Troubleshoot and configured network devices for optimal performance.
- Designed and developed responsive, user-friendly websites.
- Contributed to IT projects and solution implementations.

## TECHNICAL SKILLS

- Security Ops: Vulnerability Assessment, Pentesting, OWASP Top 10, NIST CSF, Log Analysis.
- Networking: Cisco IOS, VLANs, ACLs, OSPF, Switching, Packet Tracer.
- Tools: Nmap, Wireshark, Burp Suite, Metasploit, Kali Linux, Microsoft 365.
- Proficiencies: Python, Bash, VMware, Windows & Linux Admin.
